

Aditya Thakur

Delhi | adityathakur1709@gmail.com | +91 9667451545

Portfolio: adityax.space | LinkedIn | GitHub: adityathakur17

Skills

GenAI: LangChain, LangGraph, Agent SDK, RAG, Vector Databases, Prompt Engineering

Software Development: Reactjs, Nodejs, Nextjs, Django, Django REST Framework

Languages: JavaScript, TypeScript, Python

Tools: Docker, Git, GitHub, Postman

Databases: MongoDB, PostgreSQL

Education

Guru Gobind Singh Indraprastha University, B.Tech Computer Science Engineering

2021 – 2025

- CGPA: 8.36

Experience

Full Stack Developer, Drmeets

September 2026 – Present

- Built doctor and MR profiles, meeting workflows, wallet transactions, KYC, and bank details using Next.js, Django, and Django REST Framework..
- Built authentication and role-based access using HTTP-only cookies and CSRF protection.
- Presented the Drmeets product and new features in senior-level internal stakeholder meetings, translating implementation details into clear technical and business recommendations.

Full Stack Developer Intern, Staar Payout

May 2025 – November 2025

- Implemented comprehensive client-side input sanitization for all Staar Payout user fields, eliminating XSS vulnerabilities and reducing security incidents by 20%.
- Refactored legacy codebase by separating HTML, CSS, and JavaScript into modular files and eliminating inline styles, improving maintainability and readability.
- Strengthened backend reliability by implementing structured error handling with exception-level logging to log files, enabling faster debugging and issue tracking.

Projects

RoughNote (Next.js, NeonDB, Prisma, Clerk Auth, ShadCN, Gemini SDK, OpenAI SDK)

Live Link

- Built an AI-powered journaling platform with secure authentication, mood tracking, analytics, and intelligent journal organization.
- Implemented a Retrieval-Augmented Generation (RAG) system using vector embeddings and semantic search, enabling users to interact conversationally with their journal history and receive context-aware insights.

CloseClaw (OpenRouter, Node.js, TypeScript, Agentic AI)

GitHub

- Built a Bun-powered TypeScript AI assistant with CLI and Telegram bot modes, enabling interactive question answering, goal planning, and agent-driven task execution.
- Integrated OpenRouter model access and optional web-tool support for automated workflows, codebase analysis, and secure owner-only Telegram command control.

NotebookLM (Next.js, LangChain, OpenAI SDK, RAG, Clerk Auth, ShadCN)

GitHub

- Built a multi-stage prompt-engineering RAG pipeline 30% more efficient than traditional RAG chatbot, using LangChain, OpenAI, and Qdrant with query rewriting and HyDE.
- Integrated vector similarity search with Qdrant and OpenAI embeddings for intelligent document retrieval and context-based answer generation.

Certifications and Publications

GenAI with JS — ChaiCode, 35+ hours

Certificate

Research Publication: *Revolutionizing Programming With AI: A Comprehensive Review of Code-Generating Language Models* — Co-author, Scopus-indexed

GRENZE Scientific Society
